## Your Expert Technology Partner Providing Beyond State-of-the-Industry Products And Services

Customized for Your Specific Needs

### Why Partner with Hotwire Communications?

Hotwire Communications was built for the long-term from the inside out. While our competitors re-brand and switch strategies, Hotwire continues to stay ahead of the technology curve. Our own end-to-end network allows us to deliver products that customers want today and will ask for tomorrow. Our local level leadership model allows us to put our customers and communities at the top.

### Fully Owned & Operated, Dedicated 100% Fiber Optic Network

- More than 1,000 communities, have become customers since our founding in 2002
- Gigabit-Speeds: Over 100 times faster than average speed delivered in the U.S.
- Redundancies on Redundancies: We build our network into every property and deploy a fiber ring architecture throughout our entire network, so if there is a cut our network and your service will not go down
- Our network and services remain completely operational in all weather, including extreme conditions

### Community Focused, Concierge-Level Service

At Hotwire Communications, we are committed to providing a seamless, best-in-class service experience. With a dedicated team and personalized services, we're sure that you'll discover the difference every step of the way!

- Dedicated Account Manager as point of presence on property
- Dedicated Launch Account Manager during construction
- Hotwire Technicians, dedicated to your property, come to you
- Dedicated Property Manager during construction of the network
- 100% Local Based Customer Care available 24/7/365
- Custom built Community Website to keep you updated

### State-of-the-Art Technology Solutions

#### Fision TV+

Enjoy easy access to entertainment across live and recorded TV, video on demand, streaming and thousands of integrated apps.

Fision TV+ provides a seamless television watching experience with advanced features like intelligent search, customized apps and more!

#### Fision Internet

With high speed Internet of up to **10 gigabits (10,000 Mbps)**, you will be provided with reliable and consistent speeds not affected by how many residents are using the internet or what time of day they connect.

Our robust, wireless router can support dozens of WiFi enabled devices and do it all seamlessly, securely, and simultaneously.
